

Concurrent Sessions

Data Management

Facilitator: David Cotton
CDC Representatives: Choi Wan, Jaime Altamirano, Xiaohong Mao-Davis
Health Department Peer: Mari Gasiorowicz, WI
CBO Peer: Prescott Chow

These sessions addressed data management issues that jurisdictions have faced when implementing Guidance activities. Discussion was around the following questions: Are there ways of easing the burden of data entry and analysis at the program and state levels? How can jurisdictions reduce the lag time in processing and difficulty in providing tailored data reports? How can jurisdictions support CBOs' ability to collect, tabulate, and manage data given frequent staff turnover?

Two sessions were convened for this topic. The presentations delivered as an overview were identical and have not been presented twice. However, the dynamics of each group were different, and the input itself is presented separately.
